Door-to-door overhaul

Send your engine to our workshop to Poland and receive ready after overhaul. We will overhaul, regenerate parts, change old parts with new ones – after renovation we will test and give away with the S-Guard warranty in your hands.

Is there a lack of experienced mechanics, rising employment costs, problems with staff accommodation? We have the solution! Send your engine to a professional service in Poland. We will pick up the engine from you – we will repair it in our workshop – we will deliver the finished engine, after load tests, to your company's door.

*

DETAILS OF THE OFFER

1. Overhaul – service mechanics team

Our group of specialised mechanics will come to the overhaul site and carry out the necessary service work. You can expect a minimum of two service mechanics, up to a maximum of six, depending on the scope of the overhaul. Our staff is equipped with professional measuring and service equipment. We understand the importance of a professional approach. After the overhaul by our service team is completed, your engine will run as smoothly as ever.

2. Spare parts

You don't have to worry about ordering spare parts anymore. We will make sure that all parts arrive on time and check whether the received parts are ready for repair.

We have several options when it comes to spare parts:

- Workshop renovation – parts and appliances refurbished in our workshop.
- Manufacturers spare parts – OEM original spare parts from the engine manufacturer.
- Substitute spare parts – spare parts from good manufacturers, but not genuine

3. Operational inspections program

Our team will take care of all necessary maintenance operations. We will take care of operational inspections in accordance with the factory instructions. In due time, we will replace the oil, check the valve clearances, or replace the necessary bearings. We will make sure that your engine is under constant service control
